Dear Dr. Chio:

We are writing to you in behalf of the Venezuelan Foundation of Heart Failure and the Scientific Committee of the VI Venezuelan Congress and II Latin-American Congress on Heart Failure to be held in Valencia, Venezuela, from March 03-06, 2010.

As you may know a large number of physicians and investigators from Cardiology, Internal Medicine, Nephrology, or Cardiovascular Surgery, will be attending this Congress, along with a selected group of prestigious speakers.

We hope you would accept this invitation to present a 30 minutes Plenary Conference in this National and International Congress. Your conference will address aspects of the Physics & Development of Pulse Dynamics.

Therefore, it is a pleasure for us to have you discuss the development of DynaPulse, the first medical device allowing to measure resting or ambulatory hemodynamic on patients with hypertension, heart failure, or other cardiovascular diseases.

Welcome to our Country! Sincerely yours,

*Carlos Luis Delgado-León, MD  
Vice-President of Venezuelan Foundation  
of Heart Failure  
University of Carabobo, UAMI*

*Prof. Antonio Delgado-Almeida, MD, FAHA  
Director, Hypertension Research Unit,  
University of Carabobo Medical School*
